

Grand Rapids, Wisconsin, Wednesday, Apr. 7th, 1909

DRUMB &amp; SUTOR, Publishers

COMING ATTRACTIONS  
DALY'S THEATER.

Friday, April 9th, The Runaways, a big musical comedy, 37 people.

Friday, April 30th, Lyman Twins.

Thursday, April 15, Two Orphans.

## City Cleaning Weeks.

April 12th to 31st the city teamster will collect ashes and other back yard accumulations during these weeks. Ashes must be kept in one pile and tin cans and kindred objects in a separate pile. Got ready for the teamster or you may not be able to secure his services later.

## Money When Traveling.

When away from home it is always a problem to carry expense money without any risk. To provide for this the First National Bank has arranged with a large Chicago Bank to sell their "Travelers' Checks."

These checks are payable anywhere in the world. If you are going to the old country you can see on the face of the check just how much foreign money it is worth, while in the United States it is payable in dollars.

You can divide your money into ten and twenty dollar checks and then use them to pay hotel bills and other expenses as needed. No identification is necessary except to sign your name on the check.

When you plan to take a little trip, the Bank would be pleased to give or send you a booklet telling all about Travelers' Checks.

## Stock Fair Tuesday.

The regular monthly stock fair in the city of Grand Rapids will be held on Tuesday, April 13th, on the west side market square.

Take notice that two large teams are wanted, also some new milch cows, young pigs and cheap farm horses. Do not forget that the Reiland Packing Co. will take all your stock at the best market prices.

Farmers and others interested in the matter are notified to take account of the date and be on hand if they have anything to dispose of.

## Dance at Possley's.

There will be an Easter dance at Possley's hall at Byron on Wednesday evening, April 14th, to which the general public is given cordial invitation. Supper will be served and music will be furnished by the Bliss orchestra.

## A QUIET ELECTION

Not Much Excitement In This City Over the Selection of Aldermen

Election day was rather quiet in this city, owing no doubt to the fact that the only officers to be selected were aldermen, and in some instances the strife was not very active.

The only official voted for in all the wards was that of Justice of the Peace and as Edward Pomataville was running without opposition he won a walk. The vote in the city was light, owing partly to the bad weather that prevailed and partly to the lack of interest in some of the wards.

In the first ward there were two aspirants for alderman, Bruce Andrew and O. J. Strutton, Andrew winning out by a majority of 31. Wm. H. Reeves was elected supervisor without opposition.

In the second ward there were three candidates for alderman, E. S. Rounne, Ed. F. McCarthy and Samuel Rowson. Mr. Rounne won out, receiving 77 votes, while McCarthy got 38 and Rowson 23. A. J. Hasbrouck was elected supervisor without opposition.

In the third ward there were two candidates for alderman, they being E. W. Ellis and Joseph Cohen. Mr. Ellis won out by a majority of 19 votes. Edward Lynch was elected supervisor without opposition.

In the fourth ward Adolph Panter was elected alderman and Geo. T. Rowland supervisor, both without opposition.

In the fifth ward there were two candidates for alderman, Joe Lukasek and M. F. Urbanowski. Lukasek won out by a majority of 18 and P. C. Henke was elected supervisor of the ward.

In the sixth ward there was a close race between Fred Jackson and Wm. E. Eribanow for alderman. Mr. Jackson winning out by a majority of seven votes. Frank Rourke was elected supervisor.

In the seventh ward there were three aspirants for the office of alderman, they being Clark Lyon, Alex. Mindak and Robert L. Nash. Mr. Nash won out by securing 47 votes, Mr. Lyon receiving 44 and Mr. Mindak 33. Patrick Mulroy was elected supervisor of the ward without opposition.

In the eighth ward J. J. Jeffrey was elected alderman and B. R. Gorgins supervisor, both without opposition.

## Sidel.

Supervisors—Sim Worland, chairman; Paul Kowalczyk and Herman Pasol.  
Clerk—Chas. Eckland.  
Treasurer—Vincent Brostowitz.  
Assessor—Eric Berg.  
Justice—Steve Zorkosky.  
Constable—Lucas Perch.  
The wets and dries had a contest in this town the wets winning out by a majority of 60.

## Nekoosa.

President—A. R. Cowie.  
Clerk—H. E. Fitch.  
Treasurer—John P. Nash.  
Assessor—F. X. Grode.  
Supervisor—Wm. Hooper.  
Justice—Martin Brault.  
Police Justice—M. Brown.  
Constable—J. H. Koehler.

## Randolph.

Supervisors—Joe Reimer, chairman; John Joosten and Carl Omholt.  
Treasurer—Peter Akey.  
Clerk—Geo. Rivers.  
Assessor—Will Piltz.  
Justice—W. J. Clark.  
Constable—Gilbert Akey.

## Village of Port Edwards.

President—G. F. Steele.  
Treasurer—O. W. Dodge.  
Clerk—C. A. J. Bradner.  
Assessor—F. S. Braxton.  
Supervisor—E. E. Richsteadt.  
Justice—R. W. Cahill.  
Constable—Frank Withorn.  
Police Justice—J. E. Avenell.

## Hansen.

Supervisors—O. E. McKee, chairman; Herman Sager and Adam Sojvaska.  
Clerk—Wm. Eliart.  
Treasurer—Chas. Thilman.  
Assessor—Louis Kluge.

## Town of Grand Rapids.

Supervisors—Gus Giese, chairman; Louis Eberhardt and Geo. Shearier.  
Clerk—F. J. Hightoff.  
Treasurer—John Piesley.  
Assessor—F. J. Hightoff.  
Justice—Gus Holke.  
Constable—Gus Holke.

## Remington.

Supervisors—L. Ward, chairman; T. Brønston and O. Kollka.  
Clerk—Grover Scott.  
Treasurer—Anton Frost.  
Assessor—Wm. Remington.

## Seneca.

For chairman Angus Bartel and George Conklin were tied on the vote, the side members being Will Jackson and Nels Nelson.  
Clerk—Charles Hiltner.  
Assessor—Wm. Fattner.  
Treasurer—Morris Smith.

Reports from Seneca this morning are to the effect that the election in that town will be declared illegal, as it is claimed that men voted who were not entitled to vote in the town.

## Crawmoor.

Supervisors—A. E. Bennett, chairman and C. Seale, and Ed. Kroger.  
Clerk—Clarence Seale.  
Treasurer—Oscar Potter.  
Assessor—S. M. Whittlesby.  
Justice—A. E. Bennett.  
Constable—Joe Schiller and Harry Whittlesby.

P. G. Gilkey was called to Madison on Tuesday to serve on the grand jury.

## Summarized Report of the Civics Committee of the City Federation of Women's Club, Grand Rapids, April 2, 1909.

A Civics program was arranged for the June meeting 1908.

J. Horace McFarland, President of the American Civic Association, was engaged and delivered a lecture on the "Grassroots Against Unhygienic."

Correspondence and interview with Supt. Seymour of the Green Bay & Western R. R. resulted in the removal of unused tracks above the dam.

A door to door canvass was made by the committee and the merchants requested to burn papers and other debris accumulating at the rear of buildings. The merchants courteously acceded to the request. It is evident to all observers which of the merchants kept the agreement.

The following ordinance states the law on this subject:

## ORDINANCE NO. 115.

Section 1. It is hereby declared unlawful for any person or persons, corporation or corporations, to dump, unload, throw or deposit any rubbish, debris, waste material or garbage of any kind or description along or upon either bank of the Wisconsin River at any point within the corporate limits of said city.

Section 3. Any person or persons, corporation or corporations, who shall violate the provisions of Section 1 of this ordinance shall be punished by a fine of not less than \$2.00 and not more than \$25.00 and cost of prosecution; and upon failure to pay said fine and costs, shall be committed to the county jail of Wood County not less than five days nor more than twenty days.

Investigations of conditions behind bill boards at the foot of Oak street, disclosed an old sewer and razed edges of buildings, which presented for the present insurmountable difficulties, and made the bill boards unattractive until a new building is erected and the sewer removed.

Letters were written to Mr. Rounne and Mr. Daly asking them to cooperate with us by removing objectionable wall signs and forbidding the placing of signs in the future.

Mr. Rounne complies with the request, giving permission to paint our sign after October and agreeing not to allow more signs to be painted.

The Grand Rapids Improvement Association was organized for the purpose of purchasing property valuable for park purposes and for the developing of the city's resources.

To this end, the association has acquired the river banks below the city bridge, with the exception of two lots; and sixty-six acres of land below the Northwestern bridge, including islands and all of the west side river banks from Boles creek to the Lyons property, with the exception of two small properties.

These acquisitions are valuable assets to the city as they will preserve for all time, the beautiful river banks, which will be more and more appreciated in the future. All buildings on the east side river banks have been removed and on the west side, the LaMadaline and Wheelbarrow buildings. The laundry building will be moved as soon as vacated, within six months.

The city has begun condemnation proceedings against the Harvey Geo. Malcom and Preston blacksmith buildings.

Realizing that there is urgent need of a more commodious depot and that a town is advertised favorably or otherwise by what travellers see from car window, a petition was circulated requesting the St. Paul R. R. Company to build a new station.

This petition was supplemented by personal letters from some of the large shippers.

Last September the city accepted the gift of the Robinson Park of eighteen acres. This gift is especially valuable to the city as it includes natural groves, which are fast disappearing in this vicinity.

The city park was kept in as good condition as the dry season would warrant, the shrubs are growing nicely. More grass seed will be sown this spring.

The playground on the west side was mowed once last summer, but it should, at least, be mowed twice a season.

Articles pertaining to the city improvements have been sent to the papers from time to time.

The week commissioner was occasionally reminded of his duty and succeeded in keeping the weeds down fairly well. Many residents kept their premises carefully mowed to the streets and all weeds cut.

If it is neglected lawns and streets present a most untidy appearance.

Fifteen hundred Red Cross Stamps were sold during the holidays to aid in stamping out the great White Plague, tuberculosis.

A tuberculosis exhibit is scheduled to reach here July 26th, and will be placed on exhibition one week. A demonstrator and lecturer from the Extension Department of the University have the exhibit in charge.

Health cards have been placed in public places.

One dozen enamelled metal anti-spitting signs, patterned after those used in eastern cities, have been placed in the business section.

When the public realize that the filthy habit, which these signs prohibit, is a menace to health, we believe the law will be enforced.

Complain to the marshal, if you see any one expectorating on the sidewalk.

Steps have been taken whereby we hope to secure the co-operation of the school children in the clean street effort, and it is possible a junior

leaven will be formed.

An attractive stone bridge has been built by the Consolidated Company connecting the island on which their new office will be built and the adjacent banks on the west side below their mill. The company has also promised to clean the river banks on the east side, south of the dam, and to put them in good condition.

Arrangements have been made for the city cleaning weeks from April 12th to 31st. The city teamster will collect all refuse. Have ashes in one pile and tin cans and kindred objects in another pile.

The city teamster promises to use the ashes for the necessary filling on river banks above the dam. Residents offer to seed and care for the same when it is in condition to do so.

We recognize the necessity of a garbage system and recommend the investigation of the methods in other cities of this size.

It is recommended that when a new building is erected north of the bill boards at the foot of Oak street, the boards be removed, necessary filling done, and a vista opened onto the river, thus providing a pleasing scene to those on the sidewalk and those driving.

It is recommended that the Grand Rapids Improvement Association consider the purchasing of the William's and Vaughn properties on the west and south end of High street. This charming view should be left open for citizens to enjoy, besides, if built up it would present a most objectionable array of back yard adjuncts to travelers over the N. W. Railroad, leaving unfavorable impressions of the town.

The purchase of this land is an important consideration in relation to the river bank system. It is recommended that the succeeding Civics committee shall ascertain the ordinances of other cities with reference to the location of barns and outbuildings.

It is recommended that an effort be made to preserve the pine groves near the city and the trees along the drives to Byron and Nekoosa.

It is recommended that the agitation of a river side drive, along the east bank, south of the N. W. Railroad bridge, to Nekoosa, be continued and the project carried to completion this year.

That a resolution expressing appreciation and thanks be sent to the Mayor and common council for their co-operation in civic improvement during the year.

City Advertised

Grand Rapids is being well advertised throughout the state and the United States because of its civic improvements. From the low level of dollars and cents, the city could make no better investment, and any criticism of this movement or the attitude of the council is made in ignorance of the real situation. Taxpayers should realize that the city improvements and establishment of parks add a large per cent to the value of their property.

Mrs. E. J. Wood  
Mrs. F. MacKinnon  
Mrs. George Hill  
Mrs. W. J. Courway  
Mrs. Earle Pense, Chairman

## Notice to Farmers.

Farmers and others who contemplate building will do well to see R. E. Nason, who will make their design and window frames and interior finish at a lower price than they can be made by hand.

Also makes wood tanks for watering cattle, windmill use, etc.

At Preston's old stand on First Avenue.

## Church Services.

On Good Friday at 7:30 p. m. there will be a service in the Congregational church with a sermon by the pastor on the subject, "Dawning the Cross After Christ." Easter service at 10:30 on Sunday. Special music by the choir. Sermon by the pastor. Subject: "The Sovereignty of God." Reception of new members after the sermon.

Justice Fritzinger gave the two wrestlers, Bradison and Van Bremen thirty days each in the county jail for skipping their bond at Fred Nelson's boarding house. The expense the men made for skipping out was that they wanted to get rid of the woman that was traveling with them. This was a very laudable ambition on their part, but was not sufficient for the justice to excuse them.

Martin Heindl, formerly of this city, but now of Phillips, has been in the city several days during the past week looking after some business matters. Mr. Heindl intends to build a house here during the coming summer for renting purposes, as he expects to remain at Phillips for the present at least.

The prize for good conduct at the Appleton basketball tournament, was won by the Stevens Point team. The boys from there won the same kind of a prize last year. First place in the tournament was won by Menomonie, while Superior was second and Green Bay third.

Many of the ladies who had expected to vote on Tuesday were kept from the polls by the inclemency of the weather. The ladies were not the only ones who were kept at home by the bad weather, as there were many men who did not vote.

Mrs. Lydia Houton of Green Bay visited several days in the city last week being called here by the serious illness of her mother, Mrs. R. W. Lyon. Mrs. Lyon is reported to be somewhat better during the past few days.

Marriage licenses were issued at Stevens Point the past week to Frank K. Buss of the town of Grand Rapids and Pearl Withers of the town of Grant, Portage county and Otto Kester of Grand Rapids and Eliza Klug of the town of Grant.

Walter Holberg, formerly with A. P. Hirz of this city but now located at Two Harbors, Minn., is calling on friends in the city a few days this week.

A. B. Sutor purchased the Ed Davis home on Maple street from Taylor & Scott Co.

Mr. and Mrs. Wm. Manning and daughter of Winona are visiting with relatives in the city.

## Police Lights in Operation.

Mayor Pomataville wants the Tribune to notify the people that the recently installed police lights are now in operation, and it is now possible to call up a policeman at almost any time during the night, unless he happens to be busy escorting a tramp to the city limits, building a fire in somebody's furnace, or something else of importance.

The method of getting a policeman is to call up central and tell the operator that you want a policeman. You need not be particular to state what kind of a policeman you want, whether a blond or a brunette, young or old, or anything of that sort, as there is only one policeman on each side of the river, and you will have to take what you get.

Then the telephone operator will turn on the red light on the side of the river on which you live. Then drop will be a ringing sound. This will be the policeman coming to the station and where they want him. The operator in the telephone office will supply the necessary information and in about three seconds there will be a policeman kicking for admittance at the front door.

## Electric Road Matters.

This week we published for the first time the franchise of the Grand Rapids Street Railway Company. It will have to have two publications, when the council will be asked to grant a franchise to the company. So far as known there will be no opposition to granting such a franchise, as the people are pretty generally in favor of such a move.

Those interested in the matter state that there is no question but what the road will be built as soon as possible to get at the work after the preliminaries have been attended to, as those interested have no other object in organizing the company other than for the purpose of building a road.

The greater part of the right of way has been secured, this part of the work having proven easy so far, and it is expected that there will be no difficulty in securing what is left when the effort is made.

## Ripon College Glee Club Here Tuesday, April 20th.

The Ripon College Glee and Mandolin Club will appear at the Opera House on Tuesday evening, April 20th. Whosoever this club has appeared, it has given entire satisfaction. Its members are good singers, well trained and in tune with their work. Its program is varied but consistently high class and sure to please Grand Rapids people, no less than the audience in every city in which the club has appeared heretofore.

## Notice to the Ladies.

A bazaar demonstration will be given at our Grocery Dept. Friday and Saturday, April 10th and 11th by Miss Helen Shaw. Show how funds can be prepared from bazaar.

Very truly  
Johnson & Hill Co.

A son was born to Mr. and Mrs. Ernest Kerberg last week.

## GRAND RAPIDS FASHION CENTER

## The Style Store

J. T. SCHUMACHER, Proprietor

Easter Showing of the New Ideas in  
Correctly Tailored Garments for SpringSUITS, COATS and SKIRTS THAT  
BEAR THE HALL-MARK OF FASHION

NEW tailored garments in the accepted styles for the coming spring have just been received from The Workshop of Worth. STYLE, that touchstone by which all garments are judged, is pre-eminently the gift of the Workshop of Worth tailors. Wherever it has been possible for these master craftsmen to improve their product they have done so, and we unhesitatingly predict a greater popularity for Worth Styles this season than ever before.

If you are wanting a new spring garment you may read with authority fashion's decrees for the season from these garments before making your choice.

From \$15 to \$35 runs the scale of prices, on suits of many kinds and colors—all chosen for some special points which should recommend them to your taste and to your pocketbook. Suits with cutaway fronts, gently sloping, sharply sloping, suits with dip back and vented seams, English walking suits in the hipless, easy-fitting mannish effects—fascinating in their simple, graceful lines. Perfect tailoring is their best ornament, and that they were given in the WORKSHOP OF WORTH. The fabrics are particularly praiseworthy; beautiful, rich, subdued serges and worsteds in plain weaves and in a multitude of stripes.

\$25 is a wonder-worker here. We put a little special effort on this price, it's such a good average figure. And our suits at \$16.50, \$18.75 or \$20 are just as good as these prices as the higher priced garments are at their prices.

The Suit Sketched is a novelty model in the new hipless type without reverses. Has silk messaline scarf with gilt tassels ends. Skirt is gored with panel front and finished with buttons of cloth and messaline. Fabric is excellent chevron twilled serge; lining striped taffeta \$27

## We are Proud of the 21-

gored skirt model sketched. Seams are covered with tailored cloth strapings in graduated lengths, and clusters of oval top buttons, cloth covered, are set just above straps. Elegantly tailored from a serviceable quality chiffon panama; blue, gray, black \$10

## EASTER GREETING

We have on hand a beautiful line of Ladies Wash Suits in LINENS and POPLINS, colors ranging Tan, Cream, Navy, White, Blue and Pink. They are all tailored and beautifully trimmed with lace, bands and buttons, just whatever trimming you would prefer.

Prices on these Suits Range from **\$5.00 to \$16.50**

Beautiful Lunch Cloths hand embroidered 75c  
Dresser Scarfs also embroidered 75c

## ANSWER LAST CALL

### Several Old Settlers of This City Answer the Final Summons

Mrs. G. W. Mason

Mrs. G. W. Mason died at her home in this city on Wednesday evening last after an illness extending over several years, cause of death being tuberculosis. Mrs. Mason was first taken sick several years ago, and although she has been much of the time since then there was much of the time when she was suffering more or less from the trouble that eventually caused her demise. She had been gradually growing weaker for some time past and her death was not unexpected by her friends.

Deceased was born in Grand Rapids on the 21st of December, 1863, and was therefore forty-five years of age. On the 17th of August, 1887, she was married to G. W. Mason, and has since lived in this city. She is survived by her husband and her mother, the latter residing at Port Edwards, being Mrs. Henrietta Cleveland. There are also four brothers, they being Aubrey of Port Edwards, Elissa of Atlanta, Herbert of Nokoma and Percy of Dancy; and two sisters, Mrs. H. Japham of Nokoma and Miss Betta Cleveland of this city.

The funeral services were held on Saturday morning from the Catholic church, Rev. Wm. Tieding conducting the funeral from out of town besides the immediate relatives were Mrs. Max Schumacher and Mrs. Bert Cleveland of Wittenberg and Mrs. Elissa Cleveland of Atlanta.

John Dixon

John Dixon one of the old residents of this city died at his home on the west side on Thursday night after a lengthy illness the last three months of which had been spent in bed. Mr. Dixon's health had been failing for a number of years past owing principally to old age having gradually grown weaker, until the organs of the body refused to longer perform their functions.

Deceased was a native of Ireland, but came to America with his parents when he was a small boy. His parents settled in the state of New York where the subject of this sketch spent the first part of his life, coming to Wisconsin when he was eighteen years old. He came to Grand Rapids with his wife in 1884 and opened a building house where the Dixon Hotel now stands, and operated the place until later when it was replaced by the hotel, which he found it necessary to retire from active business on account of failing health.

He is survived by his wife and one son, Charles Dixon, and one sister, who resides at Louisville, Colorado.

The funeral was held on Monday morning from the Catholic church, Rev. Wm. Tieding conducting the services. Mr. Dixon was well liked in this community and has many friends who will be sorry to hear of his demise.

Berthold F. Zinn

Berthold F. Zinn of Milwaukee died at the Dixon Hotel in this city on Thursday night very suddenly of heart trouble, after an illness of only a few minutes.

Mr. Zinn came to this city in company with John E. Corrigan of Milwaukee, the gentleman having come here for the purpose of appraising the Cameron interest in the mill of the Grand Rapids Pulp & Paper company mill at Blom.

The two gentlemen arrived on Thursday afternoon and that night occupied a suite of rooms that were connected. At the time of going to bed Mr. Zinn felt rather poorly, being a chronic sufferer from heart trouble, but taking some medicine that he carried for use in such cases he retired to rest. Later in the night he awoke Mr. Corrigan, telling him that he was very sick and asking that he summon a doctor. This was done at once but before the physician arrived Mr. Zinn had expired.

Mr. Zinn was 58 years of age and had been a resident of Milwaukee since his birth, where he was well known and universally respected. He was a 32nd degree Mason, and for a number of years had been a member of the school board in Milwaukee, where he leaves a wife and two children. The remains were shipped to Milwaukee on Friday.

Mrs. Emma Patzor

Mrs. Emma Patzor died at the home of her parents, Mr. and Mrs. John Plonke, on Thursday after a lengthy illness from tuberculosis. Deceased had been sick with the malady for a number of years, and her death was not unexpected by her relatives.

Deceased was 29 years of age, having been born in this city on the 25th of October, 1899. She lived at her parents' home for several years after her marriage where her husband died about nine years ago.

The funeral was held on Saturday from the German Lutheran church, Rev. Maack conducting the last sad rites.

Does Your Spine Shiver?

"A shivering spine," said a psychologist, "is the one infallible proof of an artistic temperament. Does a shiver run up and down your spine when you listen to beautiful music or read a lovely poem or look at a superb painting? If not, the gates of art are closed to you forever. All great artists and all good critics experience this shivering sensation of the backbone before a worthy work of art. Some of these men use the shiver as a measure. The work that does not evoke it they pronounce a failure. My own spine shivers best to music. The violin solo that precedes the last act of Massenet's 'Crisp' sets up in me a tremor more potent that wrinkles the back of my coat."

Stevens Point Journal—Schiefelbein vs. Fidelity and Casualty company was among the cases just decided by the supreme court. This was a personal injury suit, brought by the plaintiff for \$25,000. It was tried at Grand Rapids, E. B. Park appearing for the defendant company. At the trial a verdict was given for the defendant company and this judgment was affirmed by the supreme court.

## THOSE DUCKS' EGGS

### Several Old Settlers of This City Answer the Final Summons

Mrs. G. W. Mason

"I was at Manilla in 1893 or 1894, I forget which," said Harry Keller, the angler, "I determined to open my show with a duck and a few ducks' eggs and asked the porter at the hotel where I could procure some."

"A very worthy woman sells eggs within a stone's throw of here," he said, "in the market place."

"And so I went to market to buy some eggs. I found the worthy woman who dispensed them and asked if they were fresh."

"Indeed they are," she answered, breaking one open to prove her words. "It was the roughest looking egg I had ever seen, a disgusting, greenish mass. 'Do you call that fresh?' I asked indignantly."

"There are no finer eggs in Manilla," she retorted, "I've been at this one stand for sixteen years, and you are the first person who has ever questioned the eggs I sell. They are fine eggs—good eggs." And she turned away from me, as if I wasn't worth talking to.

"And I thought as I walked off that if I could hit with the perfect guess, I could hit with the perfect guess. I was right. I hit the first egg in the world."

"That afternoon while I was driving with an English friend of mine I recounted the circumstance to him. He laughed. 'My dear Harry,' said he, 'you do not know one of the great delicacies of Manilla. There is no finer egg served than one of these. I have eaten eggs from the hatchling stage. Then they are perfect. They are laid hard, chopped fine and served, and they're delicious. No one here thinks of buying what you understand as fresh eggs. Why, I'll drive you now to where the eggs are prepared for market just to prove the high esteem in which these added affairs are held here."

"He drove me along the river bank, about three miles above where it emptied into Manilla bay, and there for a mile or two on both banks of the river I saw scores of natives lying on their bellies, the sun beating down on their backs."

"I got up, called my friend to one of them. Up he jumped, and there lay about two dozen duck eggs. 'These fellows,' said my friend as we drove home, 'do nothing but lie in the sun all day and bring these eggs up close to the hatching point. When they're properly matured the eggs are brought to market.'

"That night I opened my performance in the Tonia theater. Immediately after the performance we began to cover up my conjuring apparatus with tarpaulins, for every one now said that the explosion would be along within the hour, and indeed hardly had we got into the street when the roof of that theater was taken off as neatly as if it had been panned off. The last I saw of it it was found in the direction of Manilla bay."

"Luckily our hotel was only two blocks away, and we made a dash for it through the rain and lightning. But just before we got to our room when off went the roof of the hotel to John that of the theater. We stayed awake all night, waiting for the hotel to be moved somewhere out into the adjacent country."

"But the morning broke beautifully, and I felt so well that I determined to have my revenge on my fresh egg woman, who had stood for sixteen years in the market place. So I made some little preparations and again went to market to buy eggs."

"Fresh?" I queried, picking an egg from her basket.

"She eyed me suspiciously for a second and then said calmly, 'I told you yesterday I sold none but fresh eggs.' 'Why you kindly open this for me?' I asked, passing the egg to her. 'She broke it open, and out tumbled the headless, and most surprised duckling you ever saw.' 'That is the first time in all my life that any of my eggs were not good,' she gasped.

"Try this one," I said, snatching, picking another egg from the basket.

"She broke it open, and out tumbled another downy duckling. Then her face grew crimson. She hadn't breath to speak."

"Take this," I said, and she broke that, only to find duck No. 3.

"Then I pretended to grow angry and called her a cheat, at the same time picking up three more eggs and smashing them together. There were ducks joined their companions and went quacking around that basket of eggs in all the self-consciousness of just being born."

"The woman found her tongue now and began to shout at the top of her voice, calling me 'devil,' 'scurver' and other names of the like nature."

"An indignant angry crowd was around us. The woman was well known in the neighborhood, and her story gained ready credence. Two hands were placed on my shoulders, and I was told I was under arrest, and just then an inspiration struck me. I saw one of my lithe friends hang up a stall opposite. I pointed to it and then to my face, and the crowd understood. I ran completely out of ducks by that time, but I did half a dozen sleight of hand tricks for the crowd's edification and was followed to my hotel by a cheering mob at my heels."

"But I could never make up my mind to eat that entire of almost hatched duck. The sight of the 'fresh' egg that market woman broke for me on my first day in Manilla was enough for me."—Philadelphia Press.

The Trouble.

Knecker—Does Jones put his best foot forward?

Bocker—Yes, but he always puts it in something.—New York Sun.

A Common Delinquent.

The dean of a normal college, in a talk before the student body, was deploring the practice common among children of getting help in their lessons and the tendency of parents to give it too generously. As an illustration he told the following incident:

The mother of a small pupil to a Chicago school had struggled through the problems assigned for the child's next lesson and had finally obtained what appeared to be satisfactory results. The next day, when the little girl returned from school, the mother inquired, with some curiosity:

"Were your problems correct, dear?"

"No, mamma," replied the child. "They were all wrong."

"All wrong?" repeated the amazed parent. "Oh, I'm so sorry!"

"Well, mamma, you don't need to be sorry," was the reply. "All the other mamma's had theirs wrong too."

If you have backache and urinary troubles you should take Foley's Kidney Remedy to strengthen and build up the kidneys so they will act properly, as a serious kidney trouble may develop. John E. Daly and Johnson & Hill Co.

## CRANBERRY NOTES.

### WIS. CRANBERRY INDUSTRY.

From Wild Vine Growers Have Developed a Paying Crop.

The cultivation of cranberries in the Wisconsin marshes from a commercial standpoint underwent a great many pioneer efforts that did not materialize to any great financial success at the beginning. The marshes around the Berlin, Grand Rapids and Chippewa sections in this state have been harvested for cranberries for a great many years. These lands were all wild and were the property of the state and each year small amounts were brought to market. The wild cranberry is a great deal smaller than the cultivated eastern berry and did not meet with as ready a sale on the market for a great many years as the cultivated ones did, but it always had its admirers and was really liked the best for its flavor and keeping qualities and as the market extended there was more demand for cranberries.

About 1871 James Carey of Berlin, in this state, cornered all the wild berries and it was said he reaped a profit of over \$20,000 as the result of his operation. This fact acted like the finding of a new gold field and everybody got busy. All the swamp land in the above section was entered and the land office at the state capital, Madison, did what was in verity a land office business and for the next two seasons the swamps were alive with would-be cranberry growers.

Their early efforts were not a success. While they knew all about harvesting the berries, they did not have the first rudiments of how to propagate the berry vines in sufficient quantity to make a success. They started in by ditching and making artificial beds, with the supposition that nature would supply the vines in some mysterious way and all that they had to do was to have a dead giving them the right to own what grew on their allotment and an abiding trust that the berries would be there when harvesting time came.

After a season or two they gave up as quickly as they had begun and the land reverted back to the state and was sold for taxes. But this effort had its effect. They found out what was the cause of non-production. In plain life, as in all of nature's doings, it is the battle of economy and the cranberry had its enemies which destroyed or hindered its growth, consisting of brush, feather grass, mosses, wild grass, the swamp fern and overgrowth of water. There was a few who never lose faith in a project and out of the failure of many a few gained an insight.

James Gaylor and his brother, James, and a few others got together and induced the state legislature in 1874 to make an appropriation of \$200 annually for an experimental station which was set up on the Gaylor marsh. A great deal of information from experiments was gained and at present there are now 7 acres in this tract, which has been for a number of years under the direction of the Wisconsin State university. It was positively learned that cranberries would do well in any marsh north of the forty-second degree, north latitude where tamarac or spruce trees and sphagnum moss could be found.

At the present time there are 181 different varieties. The leading ones are the Native, Bell, Berlin, Metallic Bell, Jumbo, Prolific and McFarlin. The last named berry is a very poor product at Cape Cod, but in the Wisconsin marshes it is a high class product. In the years of 1894 and 1895 the swamps were destroyed by

fires and 95 per cent of the native vines were lost.

The propagation of the berry is from that part of the stalk that branches nearest to the roots. While it can be obtained from the seed it is very uncertain, also from the root. James Gaylor introduced a number of special tools that made the growing of cranberries easy and at one-fourth the cost. One of them is the scaping plow and cutter, which is drawn by a horse, while the cutter is reversed and two knives that extend fourteen inches at right angles on each side from the low stock and are adjusted so as to cut from three to four inches from the surface. These sods are lifted and made a dam about the plot. By doing this scaping all weeds are disposed of and a new surface is opened for planting and the sods are made into a protective wall against a two foot free supply of water, which is now regulated by flood gates.

The work done by the experiment station has been in every way a success and the experts have been able to propagate standard varieties and the different kinds are well known under different brands that are popular in the market.

The crop from this state was quite small this year. Owing to an extremely wet fall and frost during the winter of 1907-08 the buds did not mature and the vines did not get ripe. When they do it requires a protection of snow before the intense cold comes and when they do not have it there is a likelihood of them being winter killed.

So far the growers claim that everything is all right and if there is snow enough there will be a normal crop for 1909. The crop this year was between 15,000 and 18,000 barrels. A normal crop is over 40,000 barrels. All of the Wisconsin berries are sold. This year there was an insect pest which was noticed for the first time and the growers will take a lively interest as to what damage it will do and to find methods to keep it under control or eliminate it.

The cost of producing the cultivated berry is a great deal cheaper than that of the wild berry, besides getting a much more desirable product that has a better sale on the market.

The most successful and most highly cultivated, as well as the largest cranberry marsh in this state, is that of Messrs. Wyant and Parley at Valley Junction. Each acre will harvest ordinarily 45 to 50 barrels, though some will go up to 200 barrels, but the large yields mean quite a lot of different grades, more than the smaller, which is of fewer grades.

The cranberry before it reaches the market goes through quite a lot of special appliances that have been invented from time to time as the industry has been growing and the sorter or grader is one of the most curious and intricate pieces of machinery that human ingenuity could devise, but does the desired work in the best of manner.

Bogs in Good Shape.

Reports from the local cranberry growers is to the effect that the cranberry marshes in this locality promise to come out in fine shape this spring. There was a scarcity of water last fall but this shortness has been done away with by the large amount of snow that has fallen during the past winter, and which, when melted will replenish the reservoirs in good shape. So far as can be told at this time there are indications of a good year ahead.

Getting Together.

Cranberry growers have many problems which require study if they are to make the most of the industry. There are many things which need studying out and remedies found for a lot of troubles.

Cranberry growers are inclined to keep their knowledge to themselves and not share it with others. They are not apt to say much about their discoveries and help others to a better understanding. Cooperation, except in the matter of marketing, has not received much attention in the past and the value of concerted action on the part of the growers is just beginning to be realized.

Cranberry growers should get together often and become better acquainted with each other. Their interests are identical and if better fruit can be grown by improved methods it is a benefit to the industry.

No grower knows it all, although some growers know more about cranberries than others. Some men go deeply into the subject and make close observations. They study local conditions and learn as much as they can from observation and experience. Knowledge gained in this way is good knowledge but it sometimes comes high, while consultation with some one who has tried an experiment might have told him what to do. If one grower makes a discovery along a certain line and imparts it to his fellow growers, the chances are that they in turn will impart to him other things which he did not know.

Growers should get together often. Time cannot be better spent than in discussion with others of the same trade. Cooperation breeds respect for one's calling and raises cranberry growing to a higher level.

If the growers would utilize our columns more to relate their experience in the business it would be of benefit to others and we are glad to provide the space for that purpose.

Write us a letter and tell us about a bog you have built, a ditch you have dug, a name you have made, your experience with different varieties of vines, your opinion as to the best time to set vines, or any one of a hundred other topics that may suggest themselves to you. We feel sure that there is mighty interesting material stored up in the brain of every cranberry grower and if we can only get it out and present it to our readers they will profit much thereby.—Wareham Courier.

The Hair.

A single hair, which can support a weight of two ounces, is so elastic that it may be stretched to one-third of its entire length and then regain its former size and condition. Dr. Phipps has measured the growth of hair by cutting off circles about one inch in diameter from the heads of healthy men and so comparing the growth of the patches with that of the rest of the hair. He found that the growth rate generally became slower after cutting; that in some cases the hair on the patches grew at the same rate as the rest, but that it never grew any faster.

The ordinary length of the hair on the head ranges between twenty-two inches and about forty-five inches, the latter being considered unusually long.—London Standard.

The game of golf was put down by an act of parliament in Scotland in 1541 as a nuisance. Then fines were inflicted on people who were found guilty of playing the game, for it interfered with the practice of archery, as men preferred wielding the club to pulling the bow.
